Kilit

COCKROACH TRAP

Thank you for choosing Kilit. Here is how to set up and place your cockroach traps, and how to activate your lifetime guarantee.

IN YOUR BOX

8 glue traps (20 × 10 × 7 cm)

1 pair of latex gloves

1 user guide

HOW DOES IT WORK?

1. **It goes in.** Cockroaches look for dark shelter: the small cardboard box draws them in.
2. **It sticks.** The floor is covered with a strong, ridged glue.
3. **It stays trapped.** It cannot get out again.

> No insecticide, no smell: the trap is purely mechanical and can be used in the kitchen.

SET UP IN 3 STEPS

1. **Put on the gloves provided.** They keep your scent off the trap and protect your hands from the glue.
2. **Fold the trap** into a box and peel off the paper covering the glue.
3. **Place it along the walls**, where cockroaches move: under the sink, behind the fridge, oven and dishwasher, at the back of cupboards, near pipes.

> Tip: a crumb of bread or sugar in the middle of the trap makes it twice as effective.

CHECKING AND CARE

EVERY WEEK

Check the traps: the ones that catch the most show you where the cockroaches hide.

WHEN IT IS FULL

Throw the trap away wearing gloves, in a closed bag, and replace it.

EVERY 4 TO 6 WEEKS

Replace the traps, even empty ones: dust makes the glue less effective.

> The traps detect and reduce cockroaches. In a heavy infestation, they do not replace professional treatment.

PRECAUTIONS

- Keep out of reach of children and pets: the glue is very strong.
- Do not put in the mouth.
- Glue on skin: remove it with a little cooking oil, then wash with soapy water.

ACTIVATE YOUR LIFETIME GUARANTEE

A Kilit trap breaks or stops working? We replace it. Fill in this form, it takes 1 minute.
