Kilit

MOLE TRAP

Thank you for choosing Kilit. Here is how to find the right tunnel, set your copper traps and activate your lifetime guarantee.

IN YOUR BOX

PACK OF 10

10 copper wire traps (15 cm), 10 steel stakes, 12 yellow flags, 6 m of twine, 1 setting key, 1 pair of gloves.

PACK OF 5

5 copper wire traps (15 cm), 5 steel stakes, 6 yellow flags, 3 m of twine, 1 setting key, 1 pair of gloves.

BEFORE YOU START

- **Wear the gloves provided**: they protect your hands and leave no human scent on the trap.
- **Rub new traps** with a little soil to remove the metal smell.
- Best time: September to November, then spring.

THE SECRET: THE RIGHT TUNNEL

1. **In the evening, flatten the tunnels** with your foot, between two fresh molehills.
2. **The next day, look**: a tunnel that has been pushed back up is active. That's where you set the trap.

> Always set the trap in the tunnel, never in the molehill itself.

SET UP IN 4 STEPS

1. **Locate.** Open the active tunnel by hand or with a small trowel, and clear the soil blocking it.
2. **Set.** Open the jaws with the key, slowly and straight: pressing at an angle bends the jaw.
3. **Place.** Slide the set trap into the tunnel, tie the twine to the trap and the stake, push the stake in next to it.
4. **Mark.** Put in a yellow flag and close the hole with the clod so that no light or air gets in.

CHECKING AND CARE

EVERY DAY

Check your traps. The flag helps you find them, and avoid them when mowing.

NOTHING AFTER 3 DAYS?

Move the trap to another active tunnel: repeat the foot test.

AT THE END OF THE SEASON

Rinse and dry the traps before storing them. Copper doesn't rust: they work again next season.

PRECAUTIONS

- A set trap is dangerous for fingers. Always handle it with the key and gloves.
- Keep out of reach of children and pets.
- Store the traps unset.

ACTIVATE YOUR LIFETIME GUARANTEE

A Kilit trap breaks or stops working? We replace it. Fill in this form, it takes 1 minute.
