Kilit

CEDAR WOOD MOTH REPELLENT

Thank you for choosing Kilit. Here is how to prepare and place your cedar pieces, and how to activate your lifetime guarantee.

IN YOUR BOX

- **20** rings
- **10** balls
- **10** cubes
- **5** blocks
- **5** hanging plates
- **2** sanding papers
- **1** cotton bag

> Contents shown are for the 50-piece kit. The pack of 24 contains rings only.

HOW DOES IT WORK?

1. **It scents.** Cedar constantly releases a natural oil with a woody smell.
2. **It repels.** Clothes moths avoid this smell and stop laying eggs.
3. **It freshens.** The wood absorbs moisture in wardrobes.

> 100% natural cedar, no mothballs or chemicals: it can touch your clothes.

PREPARATION IN 3 STEPS

1. **Lightly sand** each piece with the paper provided: this releases the scent.
2. **Wipe** with a clean cloth to remove the sawdust.
3. **Place them**: rings on hangers, plates hung in the wardrobe, balls and cubes in drawers, the cotton bag in a suitcase or storage box.

> Bonus: a few drops of cedar essential oil (not included) boost the scent.

CARE

EVERY 3 MONTHS

Sand the surface again when the scent fades: the wood gets its fragrance back.

EVERY 6 MONTHS

Full sanding or a few drops of cedar oil. The wood can be reused for years.

BEFORE STORING

Wash or air your clothes: cedar protects clean clothing, it does not kill larvae already there.

PRECAUTIONS

- Keep out of reach of children under 6: small parts.
- Do not put in the mouth.
- Avoid contact with the eyes.

ACTIVATE YOUR LIFETIME GUARANTEE

A Kilit trap breaks or stops working? We replace it. Fill in this form, it takes 1 minute.
